LRS Service Portal Launches *Residents can direct connect to new service provider*

Maywood, IL – Identifying ways to provide better, more affordable services is a priority of the administration, hence the recent action taken by the Village Board of Trustees to transition to the new waste service provider, Lakeshore Recycling Services (LRS) effective April 1, 2022.

As Mayor Nathaniel George Booker and the Village Board of Trustees continue to work with staff to enhance service delivery, feedback from residents is necessary to evaluate the outcomes of decision-making. One enhancement in having a new provider is an online portal dedicated to the Village of Maywood. Any service requests, information about schedules, and more is available on the portal. [LRS](#) encourages community members to contact them directly and the link is accessible on the Village of Maywood website page.

“As the Chief Administrative Officer overseeing day-to-day operations, it is important to me and staff to be informed about any issues from our residents. As we move Maywood forward, I am in regular communications with LRS to assure the transition is going smoothly and stay abreast of any concerns from our residents,” said Village Manager Chasity Wells-Armstrong.

LRS has provided a link to the online portal accessible at:

<https://www.lrsrecycles.com/location/service/il/60153/residential/maywood/>

or the provider can be reached by phone at: 1-844-633-3577.
